OVERVIEW

Designed in a compact DIN rail or wall mount housing, the AMGFIB series provide digital uncompressed transmission of the latest standard definition and high definition camera signals coupled with one serial data and three contact closure channels for remote input detection and relay control.

The units support all modern SD & HD video formats including CVBS (PAL, NTSC, SECAM), CVI, TVI & AHD and camera resolutions up to 1960p with SD, HD, 2 megapixel, 3 megapixel, 4 megapixel and 5 megapixel camera types supported from all major brands.

The serial data channel supports one RS422 or RS485 data channel in 2-wire and 4-wire mode in both directions. The three contact closure channels support two channels in the video direction (A to B) and one channel in the reverse direction (B to A).

Fitted with dual redundant power inputs supporting both DC and AC low voltage inputs ensures maximum operating reliability and the highest levels of performance.

PSUs need to be ordered separately.
